Olympian and mom, Rhonda DeLong
at Canada Olympic Park with a Cougar 1.

- ❄️ Convert your Chariot into a great, lightweight cross-country **Ski Pulk** in seconds.
- ❄️ **Go** skiing using skating or classic techniques, enjoy light ski-touring and even snowshoeing.
- ❄️ Enclosed - or ventilated - for ultimate climate and UV control, and your child is off the snow!
- ❄️ Lightweight, quick-removal performance XC skis **go** fast in most snow conditions.
- ❄️ Quick-folding design with telescoping tow-bars and a comfortable hip-belt.

HERE IS HOW IT WORKS:

All Chariot X-Country Adventures Carriers easily convert to **5** different uses: Bike, Stroll, Jog, Hike and XC Ski! This is Chariot CTS: **Child Transport System**. Whatever kits you have, you'll convert quickly, easily and without tools.

THE BENEFITS TO YOU AND YOUR FAMILY ARE:

- Compared to purchasing a dedicated ski-pulk plus separate child carriers to cycle, hike, stroll and jog, an equally able Chariot is far more economical, because of CTS.
- Get one kit, or go for them all! It's your choice.
- You have the choice of 1 or 2 child models.
- Chariot makes a full range of useful accessories to enhance your outings, like the All-Season Bunting Bag, the Infant Sling or the new Chariot Baby Bivy. *Want more info? Read our 27 ski-kit FAQs online!*
